LUCA MARTIN RIVERA

Full-Stack Developer | Systems Analyst

Neuquén, Argentina | Remote | Up to 20 hours/week | UTC-3

PROFILE

Systems Analyst and Electronic Technician building practical software for small teams. Recent paid client work includes two separate business dashboards: one connected to Tango ERP for stock and replenishment, and another covering day-to-day operations and finance. Comfortable moving from requirements and frontend work through APIs, SQL data and ongoing improvements. Available for remote contracts of up to 20 hours per week.

PAID CLIENT WORK | INDEPENDENT FULL-STACK DEVELOPER | 2020-PRESENT

TangoDash | ERP-connected inventory dashboard

Next.js | TypeScript | FastAPI | SQL Server

Connects to Tango ERP and brings article, supplier, sales and current-stock information into one stock workflow. Configurable minimum and target levels support suggested replenishment; the team can prepare purchase orders and export reports to Excel or PDF. Client code and data are private.

G2 Dashboard | Business operations and finance

Next.js | TypeScript | FastAPI | SQL Server

A separate paid project for daily business management. Modules cover stock, supplier rankings, purchasing and delivery notes, cash flow and cheques, payment calendars, expenses, cost of goods, collections and sales trends. Client code and data are private.

OTHER SELECTED BUILDS

MeetingBar: hotel inventory and ordering (Spring Boot, React, MySQL). **CanchaUp:** sports booking backend (Java, Apache Causeway, PostgreSQL). **Personal:** Mesa de Juegos, a mobile-first scorekeeper with shared rooms synced through a TypeScript API and Neon PostgreSQL, plus offline play; tono, a Spotify playlist organizer with draft review.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS
Backend: Java, Spring Boot, Python, FastAPI, Node.js, REST APIs
Data: SQL Server, PostgreSQL, MySQL, MongoDB
Delivery: Requirements analysis, Git, deployment, maintenance, Agile methods
